Frozen	Single		Technology	IQF
Colour	Brown		Odour	Neutral
Texture	Firm		Taste	Neutral
Size	140-160g, 160-180g, 140-200g, 170-220g size after glazing / frozen count			
Coating	This frozen fishery product is produced in a wet environment and contains added water and a protective ice layer. Because of the nature of the product and its production process, the percentage of the protective ice layer and the net deglazed weight of a tested sample can occasionally fluctuate with a maximum allowed deviation of 3%. The net weight of the product as declared on the label must be measured directly after removing the protective ice layer on a still completely frozen product. To determine the net weight, a minimal of 5 random taken samples should be tested at an accredited laboratory and the WELMEC method must be applied.			
	In case customer orders a product with protective ice layer <10%, Seafood Connection B.V. cannot be held responsible for quality problems regarding dehydration and/or freezer burn. In case you have any questions, please feel free to contact our office for more information.			
	Declaration			
Ingredients	95% Tilapiafillet (FISH), water, salt, antidoxidant E302.			
Allergens	Fish and products thereof			
	Ingredients can vary each lot/batch, because each supplier has his own treatment.			
		e net weight (without gl	aze)	
	Intended use			
	Heat this product well before consumption.

All deliveries take place under relevant European legislation. The goods are delivered in accordance with our general terms of delivery, as listed on the back of every invoice, mentioned on our website and filed at the Dutch Chamber of Commerce under no. 96/005. With regard to inspection of the goods, we refer to article 10 of these conditions and the following passage.

In accordance with Article 10 of the terms of delivery, the buyer must inspect the goods as soon as possible after delivery to check if there are any abnormalities or defects. In case the buyer has unpacked the goods, thawed, or otherwise further processed, Seafood Connection B.V. can no longer be held liable for defects and/or deviations.

Since raw (unprocessed, fresh or frozen) fish still have to undergo a preparation or heating step, there are no legal microbiological standards for these products, as mentioned in EU Regulation (No 2073/2005) of the European Commission. The microbiological values listed in the product specification only serve as indicators of the quality and cannot be used as a legal basis for rejection of the delivered products.

In case of deviations, a microbiological or chemical research must be performed on a minimum of 5 random chosen samples. Value m represents the level which could be reached under optimum conditions for this product.

In case a sample will be taken for analysis by authorized authorities, the goods have to remain in the original packaging and the outcome of the analysis has to be awaited.
